

# °CRYO Wave

°CRYO Wave is an ultra-modern device designed for slimming, cellulite reduction and toning. It provides a non-invasive treatment that is widely used for effective body contouring.

The cutting-edge technology combines cold and heat therapy from -18°C / 0°F to +45°C / 113°F and has become a real game-changer for many centers providing their customers with weight-management and anti-aging services across the globe.

°CRYO Wave allows to perform non-invasive and pain-free treatments involving thermal-shock for slimming, anti-ageing, rejuvenating and physiotherapeutic results. The cooperating procedures – contrast cryo-lipolysis, thermal shock, and LED therapy effects – allow for extremely effective results.

The device is fully electrical and does not require the use of chemical gases.

## FEATURES AND SPECIFICATIONS

<b>Temperature range</b>	→	°CRYO Thermal Shock -18°C to +45°C
<b>Treatments</b>	→	°CRYO Contouring - Fat reduction °CRYO Toning – anti-cellulite, anti-stretch marks °CRYO Facial – anti-wrinkle, anti-aging, double-chin contouring °CRYO Recovery - pain management, anti-inflammation
<b>Safety Features</b>	→	Thermocouple temperature sensor Illuminated treatment area Wi-Fi communication with service support
<b>Electrical specification</b>	→	Universal supply 110/230V Maximum Power consumption 250W Replaceable power supply plugs, CE certification
<b>Other features</b>	→	Non-invasive and painless Leaves no bruises or hematomas Mobile and portable Intuitive and user-friendly Ambient light Vibrating handle
